

UNIVERSITY OF CHICAGO
Flour which was then possibly obtained at
about twenty shillings per cwt. must now
stand in upwards of thirty - but had the
business been in private hands at an average
rate, the person holding it, would surely have
been provided for such a great rise, and
Government would not have felt its bad
effects.

The correctness of this statement must
be very plain, to a person of your general
information, & particular local knowledge,
and indeed you are so much more competent
than myself to represent the facts it contains
that I merely wish to submit it as a
general outline for your attention.

I am with much respect

Dear Sir

Your obed. & devoted servant
Belcher Myles
