

The head of the Lake is a river leading to Merrimacké, about 10 rods wide— another leading to Reshaubucto on the Gulf of St. Lawrence. The portage of the 1st is about 9 miles— the other about 2 miles. These rivers abound with Salmon. From St. John's to Merrimacké the distance is computed at 150 miles; from St. John's to Reshaubucto the distance is greater but the River & carrying place is better.

Adjoining Captain Fry's Grant

Paul's
Grant

Grant is a tract of 3000 acres granted to Captain William Paul which extends about one mile on the River St. John's— the front is very good, not ^{more} than $\frac{1}{2}$ mile deep. Of this whole tract there may be 500 acres of good interval; the remainder is principally sunken meadow, perhaps a small parcel of upland at the distance of 3 miles. This tract is settled by people who have taken possession without the order or permission of the proprietor.
